(subspace of $\mathbb{R}^4$)

(9) Which of the following two sets of vectors are bases for $\mathbb{R}^3$? Explain why they are or are not bases. If the set of vectors is a basis for $\mathbb{R}^3$, then find the change of basis matrix from the standard basis matrix to this set of vectors.

(a) $\left\{ \begin{bmatrix} 1 \\ 0 \\ -1 \end{bmatrix}, \begin{bmatrix} 2 \\ 1 \\ 3 \end{bmatrix}, \begin{bmatrix} 2 \\ 2 \\ 8 \end{bmatrix} \right\}$
